

NAT II Physical Science Verbal

Sr	Questions	Answers Choice
1	EXACERBATE	A. Prolific B. Inert C. Insane D. Ameliorate E. Bronze
2	BLITHE	A. Despondent B. Mutinous C. Angelic D. Rigid E. Opaque
3	LAUD	A. Substantial B. Castigate C. Inferior D. Enormity E. Move apart
4	We were amazed that a man who had been heretofore the most _____ of public speakers could in a single speech electrify an audience and bring them cheering.	A. Pedestrian B. Accomplished C. Masterful D. Auspicious
5	He ran _____	A. Quickly B. So quickly C. Quick D. So quick
6	<p>Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.</p> <p>Q: In the passage, "abused" means</p>	A. Insulted B. Talked about C. Killed D. Misused
7	SLURP : SIP::	A. Watch : minute B. Snipe : skirmish C. Guffaw : giggle D. Tiptoe : stumble
8	Bizzare :	A. Normal B. Strange C. Logical D. Tense
9	The water dispute with India was resolved in .	A. 1959 B. 1960 C. 1961 D. 1962
10	PARROT : APE::	A. Curve : Arc B. Wood : Tree C. ...

- Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at its infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic mis-information can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.
- Q: Which of the following is the same in meaning as the word "feat" as used in the passage?
- 11
- A. Process
B. Focus
C. Fact
D. Goal
-
- 12
- The green supernova is still ----- cosmetologists, as it had never been seen clearly, making it impossible to study its nature.
- A. Admiring for
B. Enigmatic to
C. Dangerous to
D. Exploited by
E. Famous among
-

- Q: Which of the following is the same in meaning as the word "obliterate" as used in the passage?
- 13
- A. Wipe off
B. Eradicate
C. Give birth to
D. Wipe out
-
- 14
- The whale shark is found in equatorial deep waters around the world, it is ----- encountered by divers.
- A. Rarely
B. Successfully
C. Anxiously
D. Constantly
-
- 15
- Normally an individual thunderstorm _____ about 45 minutes
- A. Lasts
B. Ends
C. Remains
D. Continues
-
- 16
- Who was the third President of Pakistan?
- A. Sikandar Mirza
B. Zulfikar Ali Butto
C. Ayub Khan
D. Agha Muhammad Yahya Khan
-
- 17
- The incident of Fall of Dhakka took place in.
- A. 1970
B. 1972
C. 1971

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and were repeated from one generation to another, each generation adding something of its own.

18 As man slowly grew more civilized, he was compelled to invent some method of writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his war songs and his prayers. Of course, among these ancient peoples, there were only a very few individuals who learned to write, and only few could read what was written.

Q: Before men invented writing,

- A. Literature was passed on by word of mouth
- B. Prayers were considered literature
- C. Literature was just singing and dancing
- D. there was no literature

19 DOUR

- A. Implausible
- B. Cheerful
- C. Boring
- D. Portal
- E. Spotted

20 DEBAUCH

- A. Cleanse
- B. Connive
- C. Edify
- D. Malinger
- E. Provenance
