

NAT II Physical Science Verbal

Sr	Questions	Answers Choice
1	CRAVAT : NECK::	A. Artist : Smock B. Bib : Dinner C. Muzzle : Biting D. Spats : Ankles
2	ANTIPATHY	A. Liking B. Pathetic C. Provocation D. Bluntness E. Venom
3	VESSEL : FLEET	A. Forest: Clearing B. Squadron: Rank C. Hound: Pack D. Wide: Trunk E. Lion: Lair
4	HYMN: SERENADE::	A. Ballade ; Tango B. Psalm : Love poem C. Encore : Aria D. Rock : Croon
4	HYMN: SERENADE::	E. Lion : Lair A. Ballade ; Tango B. Psalm : Love poen C. Encore : Aria

Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangulants, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.

Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers by costums agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehominid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.

Which of the following can be inferred between the behavior of orangutans and that of other ape species?

- A. While orangutans spend much of their time on the treetops, other apes live exclusively on the ground B. Orangutans and other types of apes are all sociable species but orgutants are more likely to bond for
- C. Apes such as chimpanzees rely less upon their size than average orangutans do
- D. Orangutans spend less time in the company of their members of their species than do some other apes
- E. Because of their stringent territoriality orangutans are less likely to elude capture by poachers than are other apes

6 The task seemed impossible but somehow Jalil _____ very skilyfully in the end

A. Pulled it up
B. Pulled it off
C. Pulled it away
D. Pulled it out

Anthropologists who study orangutans, distant cousins of the human race, find in the animals behavior hints of how our earliest ancestors may have lived. It has long been accepted that primates originally dwelt in the treetops and only migrated to the ground as forests began to dwindle. While to a certain extent, all primates except humans spend at least some time dwelling in trees, the orangutans, can grow as heavy as 330 pounds and live for decades, requiring copious amounts of fruits

simply to stay alive. Thus, they become very jealous of the territory where they find their food. Compounding his territoriality are the breeding habits of orangulants, since females can only breed every few years and, like humans, give birth not to litters but single off-spring.

Consequently, orangutans are solitary, territorial animals who have difficulty foraging in an part of the forest where they were not raised. Orangutans take from poachers

- A. Stress the importance of preserving orangutans as a species B. Indicate the widespread practice of animal poaching
- C. Refute the theory that orangutans can live in a variety of environments
 D. Contrast the behavior of orangutans with that of other areas

5

by costums agents undergo incredible hardship on their return to the wild. Incorrectly relocating a male orangutan is especially problematic, often ending in the animal's death at the hands of a rival who sees not only his territory but also the females of his loosely knit community under threat from an outsider. While humans, like chimpanzees, are more gregarious and resourceful then orangutans, the latter provide anthropologists with useful information about the behavior of prehominid primates and how apelike behavior influenced out ancestors search for the food and family beneath the forest canopy.

E. Emphasize the consequences of orangutan territoriality

The author of the passage discusses orangutans taken from poachers in order to

8	TEMPT	A. Paramount B. Wish C. Abstemious D. Provoke E. Hoax
9	As as she is original, Tahira has created songs for theaters, classical concerts, and Pakistani movies.	A. Versatile B. Old fashioned C. Sophisticated D. Solo
10	SUGAR : SACCHARIN::	A. Slimming : Fattening B. Lace : Collar C. Cotton : Polyester D. Syrup : Molasses
11	True health and true success go together for they are inseparably in the thought realm.	A. Interwined B. Tied up C. Bound up D. Inter-related
12	MAUDLIN: DISPASSION	A. Dauntless: Trepidation B. Mawkish: Sentiment C. Vociferous: Predilection D. Avuncular: Kinship E. Perfunctory: Laxity
13	BALEFUL	A. Doubtful B. Virtual C. Deadly D. Headless E. Virtuous
14	He had the nerve to suggest that I was cheating.	A. Strength B. Capacity C. Audacity D. Courage
15	PARROT : APE::	A. Curve : Arc B. Wood : Tree C. Crane : Boar D. Alarm : Fire
16	Prelude: Symphony	A. Drama: Epilogue B. Epilogue: Prologue C. Meal: Dessert D. Ticket: Show E. Preamble: Constitution
17	Abandon:	A. Vacate B. Foil C. Lose D. Gain
18	EAGLE : AMERICA::	A. Bath : Turkey B. John Bull : England C. Oriole : Baseball D. Statue : Liberty
19	CAT : FELINE::	A. Fate: fortune B. Puppet: statue C. Horse: Equine D. Tiger: Lion
20	The telephone several times before I answered it	A. Has rung B. Was ranging C. Would ring D. Had rung
