

## NAT II Physical Science Verbal

Sr	Questions	Answers Choice
1	MOUNTAIN: TUNNEL	A. Window: Frame B. Door: Handle C. Charcoal: Fire D. River: Bridge E. Wall: Height
2	IRK	A. Broad B. Profound C. Delight D. Lofty E. Shock
3	CANT	A. Singing through the nose B. A temporary catchword C. Begging D. A penny whistle E. Affected manner of speech

Educational planning should aim at meeting the educational needs of the entire population of all age groups. While the traditional structure of education as a three layer hierarchy from the primary stage to the university represents the core, we should not overlook the periphery which is equally important. Under modern conditions, workers need to rewind, or renew their professor. The retired and the aged have their needs as well. Educational planning, in their words, should take care of the needs of everyone.

Our structures of education have been built up on the assumption that there is a terminal point to education. This basic defect has become all the more harmful today. A UNESCO report, titled "Learning to be" prepared by Edgar Faure and others in 1973 asserts that the education of children must prepare the future adult for various forms of self-learning. A viable education system of the future should consist of modules with different kinds of functions serving a diversity of constituents. And performance, not the period of study, should be the basis for credentials. The writing is already on the wall.

In view of the fact that the significance of a commitment of lifelong learning and lifetime education is being discussed only in recent years even in educationally advanced countries, the possibility of the idea becoming an integral part of educational thinking seems to be a far cry. For, to move in that direction means much more than some simple rearrangement of the present organization of education. But a good beginning can be made by developing Open University programs for older learners of different categories and introducing extension services in the conventional colleges and schools. Also, these institutions should learn to cooperate with numerous community organizations such as libraries, museums, municipal recreational programs, health services etc.

Q: Which of the following in not true in context of the given passage?

4

5

- A. Lifelong learning is a recent concept.
- B. Worker's knowledge and skills also need to be updated constantly.
  C. "Learning to Be" defends that there is a terminal point to education.
- D. Schools and colleges should open extension services.

The history of literature can be traced to the earliest forms of the arts. Man danced for joy round his primitive camp fire after the defeat and slaughter of his enemy. He yelled and shouted as he danced and gradually the yells and shouts became coherent and caught the measure of the dance and thus the first war song was sung. As the idea of God developed, prayers were framed. The songs and prayers became traditional and wee repeated from one generation to another, each generation adding something of its own.

As man slowly grew more civilized, he was compelled to invent some method of

- writing due to three urgent necessities. There were certain things that it was dangerous to forget and which, therefore, had to be recorded. It was often necessary to communicate with persons who were some distance away and it was necessary to safeguard one's property by making appropriate tools and taking protective measure in a distinctive manner. So man taught himself to write and having learned to write, purely for utilitarian reasons, he used this new method for preserving his was songs and his prayers. Of course, among these ancient peoples, there were only a very few
- A. Creative inspiration
- B. Necessity for protective measures
- C. Artistic urge
- D. Yelling and shouting

individuals who learned to write, and only few could read what was written.

Q: The war song evolved out of

12

	BATTER	A. To improve
		B. To beat
6		C. To finish
		D. To rise
		E. Baking
	The Movement against the Qadianis was started from a procession in Karachi held on.	A. May 18 ,1952
7		B. Sep 27 ,1952
		C. March 10 ,1953
		D. April 15, 1953
	SUGAR : SACCHARIN::	A. Slimming : Fattening
		B. Lace : Collar
3		C. Cotton: Polyester
		D. Syrup : Molasses
	When the Butto Government put a ban on NAP?	A. Feb 1970
,		B. March 1974
9		C. Feb 1975
		D. Dec 1976
	The passage indicates that it is difficult to return orangutans to the wild for which of the	
	following reason?	A. A only
	A. The threat posed by new comers to other orangutans territory	B. A and B only
10	B. The conflict between males over available females	C. A and C only
		D. B and C only
	C. The scarcity of available food in the orangutan environment	E. A , B and C only
		A. By
		R For
1	I shall not desert him all the world	B. For C. With

Through the U.S. prides itself on behing a leader in the world community, a recent report shows that it lags far behind other industrialized countries in meeting the needs of its youngest and most vulnerable citizens. The U.S. has a higher infant mortality rate, a higher proportion of low birth weight babies, a smaller proportion of babies immunized against childhood diseases and a much higher rate adolescent pregnancies. These findings, described as a quiet crisis requiring immediate and far-reaching action, appeared in a report prepared by a task force of educators, doctors, politicians and business people. According to the report, a fourth of the nation's 12 infants and toddlers live in poverty. As many as half confront risk factors that could harm their ability to develop intellectually, physically and socially. Child immunizations are too low, more children are born into poverty, more are in substandard care while their parents work and more are being raised by single parents When taken together, these and other risk factor can lead to educational and health problems that are much harder and more costly to reverse.

The crisis beings in the womb with unplanned parenthood. Women with unplanned pregnancies are less likely to seek pre-natal care. In the U.S. 80% of teenage pregnancies and 56% of all pregnancies are unplanned. The problems continue after birth where unplanned pregnancies and unstable partnerships often go hand in hand. Since 1950, the number of single parent families had nearly tripled. More than 25 percent of all births today are to unmarried mothers. As the number of single parent families grows and more women enter the work force, infants and toddlers are increasingly in the care of people other than their parents.

Most disturbingly, recent statistics show that American parents are increasingly neglecting or abusing their children. In only four years from 1987-1991, the number of children in foster care increased by over 50 percent. Babies under the age of one are the fastest growing category of children entering foster care. The crisis affects children under the age of three most severely the report says. Yet, it is this period-from infancy through preschool years- that sets the stage for a child's future.

Children falling in which age group are most severely affected by the quite crisis?

A. Between 2 & Samp; 3 years

B. Between 1 & Samp; 3 years

C. Below 1 year

D. Below 3 years
E. None of these

The Romans – for centuries is the masters of war and polities across Europe,
Northern Africa and Asia Minor – have often been criticized for producing few original

thinker outside the realm of positive. This criticism, while in many ways true, is not

without its problems. It was, after all the conquest of Greece that provided Rome with its greatest influx of educated subjects. Two of the great disasters intellectual history – the murder of Archimedes and the burning the Alexandria's library – both occurred under Rome's watch. Nevertheless, a city that was able to conquer so much of the

known world could not have been devoid of the creativity that characterizes so many

other ancient emprises.

Engineering is one endeavor in which the Romans showed themselves capable. Their aqueducts carried water hundreds of miles along the tops of vast arcades. Roman roads built for the rapid deployment of troops, criss-cross Europe and still form the basis of numerous modern highways that provide quick access prominence to Rome's economic and political influence.

Many of these major cities lie for beyond Rome's original province, and Latin-derived languages are spoken in most Southern European nations. Again a result of military influence the popularity of Latin and its off spring is difficult to overestimate. During the centuries of ignorance and violence that followed Rome's decline, the Latin language was the glue that held together the identity of an entire continent. While seldom spoken today, it is still studied widely, if only so that such master or rhetoric as Cicero can be read in the original.

It is Cicero and his like who are perhaps the most overlooked legacy of Rome. While far from being a democracy, Rome did leave behind useful political tool that serve the American republic today. "Republic" itself is Latin for "the people's business," a notion cherished in democracies worldwide. Senators owe their name to Rome's class of elders; Representatives owe theirs to the Tributes who seized popular prerogatives from the Senatorial class. The veto was a Roman notion adopted by the historically aware framers of the Constitution, who often assumed pen names from the lexicon of Latin life. These accomplishments, as monumental as any highway or coliseum, remain prominent features of the Western landscape.

According to the passage, ancient Roman Roads

## A. Connected many major cities in ancient Europe

- B. Are engineering marvels unequaled in modern times C. Are similar in some respects to modern highways
- D. Were products of democratic political institutions
- E. Caused the development of modern European cities

14	EXACERBATE	A. Prolific B. Inert C. Insane D. Ameliorate E. Bronze
15	The whale shark is found in equatorial deep waters around the world, it isencountered by divers.	A. Rarely B. Successfully C. Anxiously D. Constantly

Recent advances in science and technology have made it possible for geneticists to find out abnormalities in the unborn foetus and take remedial action to rectify some defects which would otherwise prove to be fatal to the child. Though genetic engineering is still at tis infancy, scientists can now predict with greater accuracy, a genetic disorder. It is not yet an exact science since they are not in a position to predict when exactly a genetic disorder will set in. While they have not yet been able to change the genetic order of the gene in germs, they are optimistic and are holding about that in the near future they might be successful in achieving this feat. They have, however, acquired the ability to manipulate tissue cells. However, genetic misinformation can sometimes be damaging for it may adversely affect people psychologically. Genetic information may lead to a tendency to brand some people as inferiors. Genetic information can therefore be abused and its application in deciding the sex of the foetus and its subsequent abortion is now hotly debated on ethical lines. But on this issue geneticists cannot be squarely blamed though this charge has often been leveled at them. It is mainly a societal problem. At present genetic engineering is a costly process of detecting disorders but scientists hope to reduce the costs when technology becomes more advanced. This why much progress in this area has been possible in scientifically advanced and rich countries like the U.S.A., U.K., and Japan. It remains to be seen if in the future this science will lead to the development of a race of supermen or will be able to obliterate illness from this world.

Q: why, according to the author, is genetic misinformation severely damaging?

- A. The cost involved is very high.
- B. Some people are unjustly branded as inferior.
- C. Both A and B
- D. Neither A nor B

17	How many sets were given to East Bengal in fist assembly?	A. 40 B. 41 C. 44
		D. 47
18	ABOLISH	A. Hate B. End
10		C. Prosper D. Abject
	Turbid: Muddy	A. River: Lake B. Tree: Darkness
19		C. Bell: Ring D. Huge: Colossal
		E. Deep: Shallow

20 INDETERMINATE A. Calculated
B. Conclusive
C. Extravagant
D. Astonished
E. Excavated
