

## PPSC Computer Science Chapter 10 Programming Language Online Test

•		
Sr	Questions	Answers Choice
1	Sequential file organization is most appropriate for which of following applications.	A. Grocery store checkout     B. Bank checking account     C. Pay roll     D. None
2	A computer generated output that lets programmer follow the execution of their program line by line is a	A. Core dump B. Ltrace routine C. Predetail listing D. All of the above
3	Which of the following is not one of the process that a high level language program must go through before it ready to be executed.	A. Translation B. Controlling C. lading D. Linking
4	All computers execute	A. BASIC programs B. COBOL programs C. Machine language program D. FORTRAN program
5	A factor in the selection of a source language is.	A. Programmer skill     B. Language availability     C. Program compatibility with other software     D. All of above
6	Which of the following is most oriented to scientific programmling.	A. FORTRON B. COBOL C. BASIC D. RPG
7	One disadvantage of a direct access file is.	A. The delay in commuting the storage address     B. Duplication of address locations     C. Unused but available storage locations     D. All of above
8	Which of the following is most oriented to scientific programming.	A. FORTRAN B. COBOL C. BASIC D. RPG
9	Electronic spread sheets are most useful n a situation where relatively data must be input but calculations are required.	A. Little, simple B. Large, simple C. Large, complex D. Little, complex
10	Sequential file organization is most appropriate for which of following application.	A. grocery store cheackout B. Bank checking account C. Pay roll D. None
11	Which of the following is an example of problem oriented language.	A. BASIC B. PL/1 C. FORTRAN D. All above
12	In the evaluation of computer language all of the following characteristics should be considered except.	A. Application oriented features     B. Efficiency     C. Readability     D. Hardware maintenance costs
13	Which of the following is not one of the process that a high level language program must go through before it is ready to be executed.	A. Transition B. controlling C. Lading D. Linking
14	A computer generated output that lets programmer follow the execution of their programs line by line is a.	A. Core dump B. Trace routine C. Deletail listing D. Source listing
		A. little, simple

15	Electronic spreadsheets are most useful in situating where relativelydata must be input butcalculations are required.	B. large, simple C. large, complex D. little, complex
16	Which file organization is allowed try a direct access storage device.	A. Direct only     B. Sequential and direct only     C. Indexed and direct only     D. Sequential indexed and direct
17	Which of the following file organization is most efficient for a file with a hinge degree of file activity.	A. Sequential B. ISAM C. VSAM D. B-Tree
18	Which of the following generations of language will likely include the language of the feature.	A. First generation B. Second generation or third generation C. Fourth generation D. Fifth generation
19	In BASIC description comments are put in the source program with the	A. PRINT statement B. REMARK statement C. INPUT statement D. DATA statement
20	All of the following are divisions of the COBOL program except.	A. Input output B. Identification C. Procedure D. Data
