

PPSC Computer Science Topic 10 Programming Language

Sr	Questions	Answers Choice
1	In BASIC description comments are put in the source program with the	A. PRINT statement B. REMARK statement C. INPUT statement D. DATA statement
2	Sequential file organization is most appropriate for which of following applications.	A. Grocery store checkout B. Bank checking account C. Pay roll D. None
3	A factor in the selection of a source language is.	A. Programmer skill B. Language availability C. Program compatibility with other software D. All of above
4	Sequential file organization is most appropriate for which of following application.	A. grocery store cheackout B. Bank checking account C. Pay roll D. None
5	Electronic spreadsheets are most useful in situating where relativelydata must be input but...calculations are required.	A. little, simple B. large, simple C. large , complex D. little, complex
6	In a COBOL program the input output section is within thedivision	A. Identification B. Procedure C. Configuration D. Environment
7	A computer generated output that lets programmer follow the execution of their programs line by line is a.	A. Core dump B. Trace routine C. Deletail listing D. Source listing
8	Which of the following is not characteristics of COBOL	A. It is a very standardized language. B. It is a very efficient in terms of coding and execution C. It has limited facilities for mathematical notation D. It is very readable langage
9	Which of the following generations of language will likely include the language of the feature.	A. First generation B. Second generation or third generation C. Fourth generation D. Fifth generation
10	A computer generated output that lets programmer follow the execution of their program line by line is a	A. Core dump B. Ltrace routine C. Predetail listing D. All of the above
11	Which of the following is most oriented to scientific programming.	A. FORTRAN B. COBOL C. BASIC D. RPG
12	Which of the following file organization is most efficient for a file with a hinge degree of file activity.	A. Sequential B. ISAM C. VSAM D. B-Tree
13	One dis advantage of a direct access file is.	A. The delay in computing the storage address. B. Duplication of address locations C. Unsued, but available, storage locations. D. All of above
14	Which of the followina is not true of FORTRAON.	A. It was developed for scientific and mathematical application B. It is one of the oldest high level C. It is a very readable langage

		languages C. It is a problem oriented language D. All of above
15	Electronic spread sheets are most useful n a situation where relatively data must be input but calculations are required.	A. Little, simple B. Large, simple C. Large, complex D. Little, complex
16	In a COBOL program the input output section is within the division	A. Identification B. Procedure C. Configuration D. Environment
17	Which file organization is allowed by a direct access storage derive.	A. Direct only B. Sequential and direct only C. Indexed and direct only D. Sequential, indexed an direct
18	Which of the following is most oriented to scientific programmiing.	A. FORTRON B. COBOL C. BASIC D. RPG
19	Which of the following is an example of problem oriented language.	A. BASIC B. PL/1 C. FORTRAN D. All above
20	Which of the following is not one of the process that a high level language program must go through before it is ready to be executed.	A. Transition B. controlling C. Lading D. Linking
