

## PPSC Computer Science Chapter 10 Programming Language Online Test

Sr	Questions	Answers Choice
1	All of the following are disadvantage of RPG except.	A. It is a very machine dependent language.     B. It is very limited in scope     C. Is not suited for complex problems requiring extensive programming logic.     D. All of the above are disadvantages
2	Which of the following is not characteristic of COBOL	A. It is a very standardized language B. It is very efficient in terms of coding and execution C. It has limited facilities for mathematical notation D. It is very readable language
3	In a COBOL program the input output section is within thedivision	A. Indentification B. Procedure C. Configuration D. Environment
4	In a COBOL program the input output section is within the division	A. Identification B. Procedure C. Configuration D. Environment
5	In Basic description comments are put in the source program with the.	A. Print statement B. REMARK statement C. INPUT Statement D. DATA Statement
6	Electronic spreadsheets are most useful in situating where relativelydata must be input butcalculations are required.	A. little, simple B. large, simple C. large, complex D. little, complex
7	Which of the following file organization is most efficient for a file with a hinge degree of file activity.	A. Sequential B. ISAM C. VSAM D. B-Tree
8	Which of the following generations of language will likely include the language of the feature.	A. First generation B. Second generation or third generation C. Fourth generation D. Fifth generation
9	Which of the following is an example of problem oriented language.	A. BASIC B. PL/1 C. FORTRAN D. All above
10	Which of the following is not true of FORTRAN.	A. It was developed for scientific and mathematical applications B. It is one of the oldest high -level languages C. it is a problem oriented language. D. It requires extensive internal documentation.
11	All of the following are dis advantage of RPG except.	A. It is a very machine dependent langauge. B. It is very limited in scope C. Is not suited for complex problems rearing extensive programming logic D. All of the above are dis advantages
12	The two basic types of record access methods are	A. Sequential and random     B. Direct and immediate     C. Sequential and indexed     D. None
13	Sequential file organization is most appropriate for which of following application.	A. grocery store cheackout B. Bank checking account

	······································	C. Pay roll D. None
14	Electronic spread sheets are most useful n a situation where relatively data must be input but calculations are required.	A. Little, simple B. Large, simple C. Large, complex D. Little, complex
15	One dis advantage of a direct access file is.	A. The delay in computing the storage address. B. Duplication of address locations C. Unsued, but available, storage locations. D. All of above
16	In the evaluation of computer language all of the following characteristics should be considered except.	A. Application oriented features     B. Efficiency     C. Readability     D. Hardware maintenance costs
17	All computers execute	A. BASIC programs B. COBOL programs C. Machine language program D. FORTRAN program
18	One disadvantage of a direct access file is.	A. The delay in commuting the storage address B. Duplication of address locations C. Unused but available storage locations D. All of above
19	Which of the following is not one of the process that a high level language program must go through before it ready to be executed.	A. Translation B. Controlling C. lading D. Linking
20	In BASIC description comments are put in the source program with the	A. PRINT statement B. REMARK statement C. INPUT statement D. DATA statement
