

PPSC Computer Science Topic 10 Programming Language

Sr	Questions	Answers Choice
1	Electronic spreadsheets are most useful in situating where relativelydata must be input but...calculations are required.	A. little, simple B. large, simple C. large , complex D. little, complex
2	Which of the following file organization is most efficient for a file with a hinge degree of file activity.	A. Sequential B. ISAM C. VSAM D. B-Tree
3	One disadvantage of a direct access file is.	A. The delay in commuting the storage address B. Duplication of address locations C. Unused but available storage locations D. All of above
4	Sequential file organization is most appropriate for which of following application.	A. grocery store checkout B. Bank checking account C. Pay roll D. None
5	A computer generated output that lets programmer follow the execution of their program line by line is a	A. Core dump B. Ltrace routine C. Predetail listing D. All of the above
6	In the evaluation of a computer language al of the following characteristics should be considered except.	A. Application oriented features B. Efficiency C. Readability D. Hardware maintenance costs
7	The two basic types of record access methods are	A. Sequential and random B. Direct and immediate C. Sequential and indexed D. None
8	Which of the following is most oriented to scientific programmiing.	A. FORTRON B. COBOL C. BASIC D. RPG
9	Electronic spread sheets are most useful n a situation where relatively data must be input but calculations are required.	A. Little, simple B. Large, simple C. Large, complex D. Little, complex
10	Which of the following is not true of FORTRAON.	A. It was developed for scientific and mathematical application B. It is one of the oldest high level languages C. It is a problem oriented language D. All of above
11	Which file organization is allowed by a direct access storage derive.	A. Direct only B. Sequential and direct only C. Indexed and direct only D. Sequential, indexed an direct
12	Which of the following is not characteristic of COBOL	A. It is a very standardized language B. It is very efficient in terms of coding and execution C. It has limited facilities for mathematical notation D. It is very readable language
13	One dis advantage of a direct access file is.	A. The delay in computing the storage address. B. Duplication of address locations C. Unsued, but available, storage locations. D. All of above
		A. It is a very standardized language.

14	Which of the following is not characteristics of COBOL	B. It is a very efficient in terms of coding and execution C. It has limited facilities for mathematical notation D. It is very readable language
15	In BASIC description comments are put in the source program with the	A. PRINT statement B. REMARK statement C. INPUT statement D. DATA statement
16	In a COBOL program the input output section is within thedivision	A. Identification B. Procedure C. Configuration D. Environment
17	Which of the following is not one of the process that a high level language program must go through before it is ready to be executed.	A. Transition B. controlling C. Lading D. Linking
18	A computer generated output that lets programmer follow the execution of their programs line by line is a.	A. Core dump B. Trace routine C. Deletail listing D. Source listing
19	In a COBOL program the input output section is within the division	A. Identification B. Procedure C. Configuration D. Environment
20	In Basic description comments are put in the source program with the.	A. Print statement B. REMARK statement C. INPUT Statement D. DATA Statement
