

## PPSC Computer Science Chapter 23 Software Testing Online Test

_		
Sr	Questions	Answers Choice
1	is the technique used to determine that the solution solves the problem.	A. Data B. Validity C. Testing D. Problem
2	successful necessitates a portfolio of web based testing tools.	A. Web based testing B. Integrate C. Factor D. Unit testing
3	To test a function, the programmer has to write a which calls the function to be tested and passes it test data.	A. Stub B. Driver C. Proxy D. Quality is job one
4	What is critical in Web testing.	A. Performances and functionality     B. Functionality and usability     C. Usability and performance     D. Debugging
5	For which of the following would a static analysis tool be MOST useful.	A. Supporting reviews     B. Validating models of the software     C. Testing code executed in a special test harness     D. Enforcement of coding standards
6	A is lead by the author where an inspection is lead by a	A. Inspector B. Reader C. Inspector reader D. Author, trained moderator
7	Software testing accounts to what percent of software development costs.	A. 10-20 B. 40-50 C. 70-80 D. 5-10
8	is often employed for off the shelf software as a form of internal acceptance testing.	A. Alpha testing B. Beta testing C. Regression testing D. Black box testing
9	Pick the best definitions of quality.	A. Quality is job one     B. Zero defects     C. Conformance to requirements     D. Work as designed
10	The process starting with the terminal modules is called.	A. Top down integration B. Bottom up integration C. Module integration D. None of the abvoe
11	White box testing is.	A. Same as glass box testing B. Same as clear box testing C. Both a and b D. Boundary testing
12	What is the difference between testing software developed by contractor outside your country versus testing software developed by a contractor within your country.	A. Does not meet people needs     B. Cultural difference     C. Loss of control over reallocation of resources     D. Relinquishments of control
13	Automated testing is.	A. To automate the manual testing process B. To assure quality of software C. To increase costs
14	Project quality management includes all activities of the performing organization that determines.	D. Noe of the above  A. Performance quilt control B. Policies and responsibilities of a project C. Performance plan management D. Quality control management

15	Life cycle testing involves testing of the system during the developmental process.	A. Begin B. Continuous C. system D. Process
16	User requirement are the best source of expected outcomes for user scripts.	A. Actual results     B. Program specification     C. Acceptance test     D. System specification
17	testing is costly time consuming and extensive component of testing.	A. structural B. Multiplatform C. Unit D. Stress
18	based test sets tend to uncover errors that occur during coding of the program.	A. Testing B. system analysis C. Functional analysis D. Structural analysis
19	The requirement phase should be a phase.	A. User requirement     B. User dominated     C. User participants     D. User information
20	Validation is used to test the software in which mode.	A. Process mode B. Executable mode C. Test mode D. Primary mode
