

PPSC Computer Science Chapter 23 Software Testing Online Test

Sr	Questions	Answers Choice
1	The statement of an organization's policy.	A. Vision B. Mission C. principle D. Goal
2	A is a sequence of statements from one place in the program to another.	A. Route B. Path C. Sub path D. Gate way
3	Testing is the used to determine the the solution solves the problem.	A. Data B. Validity C. Technique D. Problem
4	Web based testing only needs to be done once for my applications using the.	A. Internet B. Intranet C. Web D. E-Commerce
5	The goal of regression testing is to minimize the cost of system.	A. Development B. Process C. Revalidation D. Factors
6	Thread testing is used for testing.	A. Real time systems B. Object oriented systems C. Event driven systems D. All of the above
7	The process starting with the modules is called bottom up integration.	A. Starting B. Terminal C. Integrated D. None of the above
8	Which of the following is not a characteristic for testability.	A. Operability B. Observability C. Simplicity D. Robustness
9	Effective testing will reduce cost.	A. Maintenance B. Documentation C. Design D. Coding
10	During the programming stage the softeare is.	A. Requirement analysis. B. Designing C. Coded and debugged D. Maintenance and documented
11	SWAG is the method used by most software estimating packages such as.	A. PATTERN B. ESTIMACS C. CHANGE D. WAG
12	Which of the following is part of system testing.	A. Business process based testing B. Performance load and stress testing C. Usability testing D. Top down integration testing
13	Tests are prioritized so that it is possible to.	A. Shorten the time required for testing B. Do the best testing in the time available C. Do more effective testing D. Find more faults
14	Poor software characteristics are.	A. Only project risks B. Only product risks C. Project risks and product risks D. Project risks or product risk
		A. Data tester

15	Which of the following tools would be involved in the automation of regression test.	B. Boundary tester C. capture of playback D. Output comparator
16	A will help ensure unchanged areas of the software have ot been affected.	A. Documentation B. Regression test C. Software fault D. Acceptance testing
17	Which of the following is MOST important in the selection of a test approach.	A. Availability of tools to support the proposed techniques B. The budget allowed for training in proposed techniques C. Available skills and experience in the proposed techniques D. The willingness of the test team to learn new techniques
18	Quality planning is used for	A. Quality projections B. Quality management C. Identifying quality standards and how to satisfy them D. Quality over view
19	The concept is is important in both design of and testing.	A. Helpful B. Fit C. Better D. degree
20	To test a function, the programmer has to write a driver which calls the function and passes it.	A. stub B. Test data C. Proxy D. Package
