

PPSC Computer Science Chapter 23 Software Testing Online Test

Sr	Questions	Answers Choice
SI	Questions	
1	Debugging is.	A. An activity of locating and correcting errors B. a process of testing C. A process of regression testing D. A process on compiling
2	is a black box testing technique appropriate to all levels of testing.	A. Acceptance testing B. Regression testing C. Fulvalene partitioning D. Quality assurance
3	The best testing is done in available time using.	A. No limit to fix for time B. Test priority C. You do more effective testing D. Finding more faults
4	Which in general is the least required skill of a good tester.	A. Being diplomatic B. Able to write software C. Having good attention to detail D. Able to be relied on
5	The overall objective of testing for software changes application wil function properly in the.	A. Programming environment B. Operating system environment C. Operating environment D. Life cycle environment
6	In a review meeting a moderator is a person who.	A. Takes minutes of the meeting B. Mediates between people C. Takes telephone calls D. Writes the documents to be reviewed
7	Which is not a testing principle.	A. Early testing B. Defect clustering C. Pesticide paradox D. Exhaustive testing
8	The timeliness consistency and usefulness of the data included in the automated application to the user.	A. Flexibility B. Maintainability C. Reliability D. Effectively
9	Quality planning is used for	A. Quality projections B. Quality management C. Identifying quality standards and how to satisfy them D. Quality over view
10	testing is done by user	A. System testing B. Acceptance testing C. Black box testing D. White box testing
11	Tests are prioritized so that it is possible to.	A. Shorten the time required for testing B. Do the best testing in the time available C. Do more effective testing D. Find more faults
12	Which is not the project risk.	A. Supplier issues B. Organization factors C. Technical issues D. error prone software delivered
13	Which of the processes includes all activates of the performing organization that determines policies and responsibilities of a project.	A. Performance quality control B. Project quality management C. Performance plan management D. Quality control management.
14	What is critical in Web testing.	A. Performances and functionality B. Functionality and usability C. Usability and performance D. Debugging

15	Which of the following is a benefit of test independence.	A. It does not require familiarity wit the code B. It is cheaper than using developers to tet their own code C. It avoids author bias in defining effective tests D. Testers are better at finding defects than developers
16	Which one of the following are non functional testing methods.	A. System testing B. Usability testing C. Performance testing D. Both 2 and 3
17	The requirement phase is the most cost effective phase in which to detect a.	A. Program flow B. Design flow C. Data flow D. System flow
18	The phase of the system development life cycle in which testing will occurs is.	A. Test factor B. Authorization C. Test phase D. Audit trail
19	The structure testing is sometimes called.	A. Glass box testingB. Black box testingC. Unit testingD. While box testing
20	Graph based testing comes under which testing methods.	A. White box B. Black box C. Green box D. Yellow box
