

## PPSC Computer Science Chapter 23 Software Testing Online Test

| _  |  |  |
|----|--|--|
| Sr | Questions  | Answers Choice   |
| 1  | successful necessitates a portfolio of web based testing tools.                                    | A. Web based testing B. Integrate C. Factor D. Unit testing  |
| 2  | The inputs for developing a are taken from project plan.   | A. Test plan B. Business plan C. Support plan D. Final test report   |
| 3  | Project quality management includes all activities of the performing organization that determines. | A. Performance quilt control     B. Policies and responsibilities of a project     C. Performance plan management     D. Quality control management  |
| 4  | Which of the following defines the expected result of a test.                                      | A. Test case specification B. Test design specification C. Test procedure specification D. Test results  |
| 5  | For which of the following would a static analysis tool be MOST useful.                            | A. Supporting reviews     B. Validating models of the software     C. Testing code executed in a special test harness     D. Enforcement of coding standards   |
| 6  | The identified software problems that most commonly cause bad decisions byapplication.             | A. Automated decision making B. Automate decision making C. automating decision making D. Auto decision making   |
| 7  | Which of the following statements about component testing is not true.                             | A. It should be performed by development B. It is also know as isolation or module testing C. It should have completion criteria planned D. It does not involve regression testing.                                |
| 8  | Web based testing only needs to be done once for my applications using the.                        | A. Internet B. Intranet C. Web D. E-Commerce   |
| 9  | The requirement phase is undertaken to solve a.  | A. Business problem B. System problem C. Program problem D. Design problem   |
| 10 | User requirement are the best source of expected outcomes for user scripts.                        | A. Actual results     B. Program specification     C. Acceptance test     D. System specification  |
| 11 | Maintenance testing is.  | A. Updating tests when the soft ware has changed. B. Testing a released system the has been changed C. Testing by users to ensure that the system meets a business need. D. Testing to maintain business advantage |
| 12 | Which of these can be used for testing as tool.  | A. Rational Robot B. Water fall model C. MS -WORD D. Compiler  |
| 13 | Graph based testing comes under which testing methods.   | A. White box B. Black box C. Green box D. Yellow box   |
|    |  |  |

| 14 | testing is costly time consuming and extensive component of testing.   | A. structural B. Multiplatform C. Unit D. Stress                            |
|----|--|---|
| 15 | Testing is the used to determine the the solution solves the problem.  | A. Data B. Validity C. Technique D. Problem                                 |
| 16 | Testing should indicate the cost to test the cost of undetected defects.                                       | A. Plus B. Negative C. Positive D. Minus                                    |
| 17 | Static tests are used in the requirement and   | A. Design phase B. Testing phase C. Program test phase D. Manual test phase |
| 18 | Maintenance releases and technical assistance centers are examples of which of the following costs of quality. | A. External failure B. Internal failure C. Appraisal D. Prevention          |
| 19 | The testing will be performed by the people at client own locations.   | A. Alpha testing B. Field testing C. Performance testing D. system testing  |
| 20 | Acceptance testing will be done by   | A. User B. Quality control C. Quality assurance D. Senior management        |
|    |  |   |
