

PPSC Computer Science Chapter 8 C Programming Online Test

Sr	Questions	Answers Choice
1	What is the result of the expression $6+12*3-4/2$?	A. 22 B. 25 C. 40 D. 45
2	How would you declare constant of 5 called 'MYCONST'?	A. Constant MYCONST =5 B. Int my const =5 C. # define MYCONST 5 D. #define MYCONST =5
3	Which of the following is "stringizing operator"?	A. \$ B. % C. # D. ?
4	How many number of tokens are there in the following statement provided 'value' is an integer variable. if value == 21)	A. 3 B. 4 C. 5 D. 6
5	"x" and "y" are called	A. Actual parameters B. Local variables C. Formal parameters D. Global variables
6	The storage class controls	A. Life time of a variable B. Linkage of a variable C. Scope of a variable D. a , b and c above
7	The getchar () library function	A. Returns a character when any key is pressed B. Return multiple characters when the keys are pressed C. Return multiple characters when the key are pressed followed by enter key D. Return a single character when the keys are passed followed by enter key
8	String concatenating means.	A. Combining two strings. B. Extracting a substring out of a string. C. Merging two strings. D. Comparing the two string to define the larger one.
9	Write the last element of the following array. Char flag [] = " FALSE"	A. E B. e C. /O D. \O
10	Information will be passed to the function via special identifier is called.	A. Arguments B. Parameters C. Both A and B above D. Elements
11	What is the output of the above program.	A. 5 B. 8 C. Runtime error D. Syntax error
12	'C' is a middle level language because.	A. It is evolved in Middle age of computer development. B. Not having so many features but still is robust C. Easier to learn and use D. Combines the best features of high low level languages.
13	C program language was developed by.	A. Dennis Ritchie B. Ken thompson C. Bill Gates D. ...

14	An example of a value parameter is the code above is.	A. x B. y C. c D. foo
15	Identify the correct statement from the following statements.	A. Typedef int integer B. Typedef int integer; C. Typedef int = integer : D. Typedef integer int ;
16	The getchar ()function reads a	A. String from a file B. Character from a file C. String from the key board D. Character from the keyboard
17	The address of the starting element of an array is.	A. Represented by subscripted variable of the starting element. B. Represented by the array name C. Not used by the compiler D. Represented by the size of the array
18	The type of the controlling expression of a switch statement can not be of the type	A. Int B. Char C. Float D. Long
19	Which command is used to skip the rest of a loop and carry on from the top of the loop again.	A. Break B. Resume C. Continue D. Skip
20	To read the formatted input data from a file, which of the following function is used.	A. Getchar () B. fgets() C. fscanf () D. scanf()
