

## PPSC Computer Science Full Book MCQ's test

Sr	Questions	Answers Choice
1	An IBM system /36 represents the computer class of.	A. Small scale computer     B. Medium scale computer     C. Large-scale computer     D. Super comptuer
2	Microprocessor reference that are available in the cache are called.	A. Cache hits B. Cache line C. Cache misses D. Cache memory
3	Parallel projection shows the	A. True image of an object B. True size of an object C. True shape of an object D. All of these
4	Which of the following is not a session function.	A. Session _decode B. Session _ destroy C. Session _id D. Session _ pw
5	In a COBOL program the input output section is within thedivision	A. Indentification B. Procedure C. Configuration D. Environment
6	Which command is used to copy files.	A. cp B. copy C. mv D. move
7	Error guessing is best used.	A. After more formal techniques have been applied B. As the first approach to deriving test cases C. By inexperienced testers D. After the system has gone live
8	All computers execute	A. BASIC programs B. COBOL programs C. Machine language program D. FORTRAN program
9	Which of the following is not of the four major classes of information system.	A. Decision support system     B. Collaboration system     C. Management information system     D. Expert system
10	Which of the following describes the changes made to system to add new features or to improve performances.	A. Corrective maintenance B. Adaptive maintenance C. Perfective maintenance D. productive maintenance
11	refers to the result obtained by multiplying the matrix of the individual transformation representation seuerieces.	A. Wire frame model B. Constructive solid geometry methods C. composite transformation D. None
12	What does the following statement corresponds to.  " pacifying that only people who satisfy certain criteria receive a questionnaire.	A. Purposeful sample B. Convenient sample C. Random sample D. purposeless sample
13	Which of the following is a secondary memory device.	A. Key board B. Disk C. ALU D. All of above
14	Which of the following are the two main components of the CPU	A. Control unit and registers B. Registers and main memory C. Control Unit and ALU D. ALU and bus
		A. Functions must have parameters,

15	Which of the following is an advantage of using macros over functions.	macros do not B. The code associated with a function is expanded in line C. Values passed to function must be of specific data type D. The code associated with a function is not expanded in line.
16	The processes of starting of restarting a computer system by loading instruction from a secondary storage device into the completer memory is called.	A. Duping B. Booting C. Padding D. All of above
17	A compute programmer	A. Does all the thinking for a computer B. Can enter input data quickly C. Can operate all types of computer equipment D. Can draw only flowchart
18	Which of the following communication modes support two way traffic but in only one direction at a time.	A. Simplex B. Half duplex C. Three quarters duplex D. All of the above
19	Which is not the part of the UDP data gram.	A. source port B. Destination port C. Check sum D. None
20	In a TCP Header source and destination header contains.	A. 8 bits B. 16 bits C. 32 bits D. 128 bits
