

Maths - 10th Class Mathematics English Medium Chapter 6 Preparation

Q1. What is cumulative frequency ?

Ans 1: The total of frequency up to an upper class limit or boundary is called the cumulative frequency.

Q2. Write down the properties of arithmetic mean.

Ans 1:

Q3. Define standard deviation.

Ans 1:

Q4. What do you mean by Harmonic mean ?

Ans 1:

Q5. Name two measure of central tendency.

Ans 1: 1. Arithmetic mean
2. Median

Q6. Define average.

Ans 1: Any number that is used to represent the data is called average.

Q7. Calculate mean for 10,15,20,25,30,35.

Ans 1:

Q8. What is Range ?

Ans 1:

Q9. What is a Histogram ?

Ans 1: A Histogram is a graph of adjacent rectangles constructed on XY - plane.

Q10. Define frequency distribution.

Ans 1: A frequency distribution is a tabular arrangement for classifying data into different groups and the number of observations falling in each group correspondence to respective group.
