

Maths - 10th Class Mathematics English Medium Chapter 9 Preparation

Q1.
Ans 1:
Q2. What is segment ?
Ans 1: A segment is the portion of a circle bounded by an arc and a corresponding chord.
Q3. What is major segment ?
Ans 1: In the figure, the bigger segment AOB is the major segment.
Q4. What is sector of circle ?
Ans 1: A sector of a circle is the plane figure bounded by two radii and the intercepted between them.
Q5. What are non-collinear points ?
Ans 1: Three or more points do not lying on the same line are called non-collinear points.
Q6. What is centre ?
Ans 1: The fixed point O not lying on the circle is called the centre.
Q7. Define circle.
Ans 1: A circle is the locus of a moving point P in a plane which is always equidistant from some fixed point O.
Q8. Define radius.
Ans 1: The constant distance that is traced by moving point P from the fixed point O is called radius.

Q9. What is circumcircle?

Ans 1: The circle passing through the vertices of a triangle is called circumcircle.

Q10. Define radian segment.

Ans 1: The radial segment of a circle is a line segment, determined by the centre and a point on the circle.
