Business Statistics (E.M) - ICom Part 2 Business Statistics Chapter 2 Short Questions Test

Q1. What is frequency distribution.

Ans 1: An arrangement of givne data in the form of a table showing frequency with which each variable occurs is called frequency distribution.

Q2. What is the upper limit of class 45-50

Ans 1: 50

Q3. Waht is open end class.

Ans 1: A class without upper class limit or lower class limit is called open ends class.

Q4. Define Array.

Ans 1: An arrangement of data is order of magnitude either in ascending or in descending order is called array.

Q5. What is relative frequency.

Ans 1: Class frequency expressed as a ratio of the total frequency is called relative frequency.

Q6. What is the mid point of class 16-12

Ans 1: 14

Q7. What are undgoruped data.

Ans 1: Ungrouped and unclassified data are called unground data.

Q8. what is grouped data.

Ans 1: Data arranged into their frequencies are called grouped data.

Q9. Difference between histogram and historigram.

Ans 1: A graph of frequency distribution is called histogram whereas historigram is the grap of time series.

Q10. What is the upper class boundary

Ans 1: Figure which represents higher limit in particular class is called upper class boundary.
